FOREWORD

# Editorial principles

---

## Tone of voice

Calm, declarative, archival. The site speaks once, in a low confident register. Avoid marketing register, avoid hedging. Sentences should be complete and rhythmic, not punchy.

## Privacy-first posture

The site collects nothing and delivers no analytics, cookies, trackers, third-party requests, or external runtime. Copy that reinforces this — privacy page, security page, cite/verify overlays — should be precise and uncluttered. Never overclaim; describe.

## Architectural / editorial relationship

The site itself is part of the artefact. Copy is published, signed, and versioned alongside the code. A copy edit ships the same way a code change ships: through tools/i18n/strings.json into a build, then into a signed release. The deployed bytes are the canonical text.

PART 02

Homepage

55 entries

○ **BODY** **HOMEPAGE — APPROACH** · ADOPTION\_BODY  
approach.adoption\_body

A strategy or technology only creates value when teams trust it and choose to use it. Trust must be earned, and utility must be proven. Client Advisors are first-line Clients and vital collaborators.

○ **TITLE** **HOMEPAGE — APPROACH** · ADOPTION\_TITLE  
approach.adoption\_title

## Adoption matters more than tools

○ **BODY** **HOMEPAGE — APPROACH** · AI\_BODY  
approach.ai\_body

Authenticity is a human advantage, and it cannot be automated. Trust, empathy, and judgement are built in the moment through tone and presence. I use AI to remove friction so people can show up more relevant, more consistent and more human, at scale.

○ **TITLE** **HOMEPAGE — APPROACH** · AI\_TITLE  
approach.ai\_title

## AI should amplify human relationships

○ **BODY** **HOMEPAGE — APPROACH** · CLIENTELING\_DETAIL  
approach.clienteling\_detail

<dfn id="clienteling-definition" itemprop="name">Clienteling</dfn> <span itemprop="description">is a discipline. It is the practice of transforming what a Client Advisor knows into something a Client feels. The moment interactions become mechanical, it stops being Clienteling.</span>

○ **TITLE**   **HOMEPAGE — APPROACH** · CLIENTELING\_TITLE  
approach.clienteling\_title

## Clienteling converts transaction into meaning

○ **BODY**   **HOMEPAGE — APPROACH** · GOVERNANCE\_BODY  
approach.governance\_body

Clear ownership, cadence, and priorities create alignment, accelerate decisions, and enable scale.

○ **TITLE**   **HOMEPAGE — APPROACH** · GOVERNANCE\_TITLE  
approach.governance\_title

## Governance creates momentum

○ **BODY**   **HOMEPAGE — APPROACH** · GROWTH\_BODY  
approach.growth\_body

Lasting growth follows when elegant systems are in place.

○ **TITLE**   **HOMEPAGE — APPROACH** · GROWTH\_TITLE  
approach.growth\_title

## Client growth takes discipline

○ **LABEL**   **HOMEPAGE — APPROACH** · LABEL  
approach.label

### Approach

*Section anchor label.*

○ BODY HOMEPAGE — APPROACH · TASTE\_BODY  
approach.taste\_body

Discernment, and cultural awareness shape interactions into something valuable and memorable.

○ TITLE HOMEPAGE — APPROACH · TASTE\_TITLE  
approach.taste\_title

Taste is a strategic advantage

Integrity & Releases

125 entries

○ **BODY** INTEGRITY PAGE · BODY\_INTRO  
integrity.body\_intro

Every public file is hashed and listed in a manifest, signed with a detached `<abbr title="Pretty Good Privacy">PGP</abbr>` signature so each release can be checked against the publisher's key - independently, on your own machine, without trust in this server. You can `<a href="/integrity/verify-locally/" aria-describedby="desc-verify-locally">verify locally here</a>`.

○ **TITLE** **RELEASES INDEX** · **DETAIL**  
releases.detail.card.title

## 9 May 2026

○ **BODY** **RELEASES INDEX** · **DETAIL**  
releases.detail.intro

Signed release archives for the 9 May 2026 edition. A signed checksum list verifies the archive set; checksums verify the downloaded files; detached signatures verify each archive directly. The signed manifest at /integrity.json remains the live-site authority.

○ **BODY** **RELEASES INDEX** · **DETAIL**  
releases.detail.note

Archive binaries are not included in /integrity.json to avoid recursive hashing. They are verified separately through the signed checksum list, individual SHA-256 checksums and detached signatures. <a href="/integrity/">Integrity</a> remains the live-site authority.

security.public\_verification\_summary

## 5. Public verification surface

○ **STRING** **SECURITY PAGE** · S1\_ROUTES\_NOTE  
security.s1\_routes\_note

Public inspection routes expose the signed manifest, page records, readable source mirrors and archived releases without exposing private infrastructure.

○ **STRING** **SECURITY PAGE** · S1\_SUMMARY  
security.s1\_summary

## 1. Architecture

○ BODY SECURITY PAGE · S2\_BODY  
security.s2\_body

The controls described here protect:

○ STRING SECURITY PAGE · S2\_LIST  
security.s2\_list

Domain ownership DNS integrity Hosting account integrity Public content integrity The signing key used for release authenticity

○ STRING SECURITY PAGE · S2\_SUMMARY  
security.s2\_summary

2. Assets protected

○ STRING SECURITY PAGE · S3\_ADMIN\_HEADING  
security.s3\_admin\_heading

Administrative abuse

○ STRING SECURITY PAGE · S3\_ADMIN\_LIST  
security.s3\_admin\_list

Credential stuffing Automated vulnerability scanning

○ STRING SECURITY PAGE · S3\_CONTENT\_HEADING  
security.s3\_content\_heading

Content tampering

○ **STRING** **SECURITY PAGE** · S3\_CONTENT\_LIST  
security.s3\_content\_list

Post-deployment file modification Malicious JavaScript injection Silent alteration of static assets

○ **STRING** **SECURITY PAGE** · S3\_INFRA\_HEADING  
security.s3\_infra\_heading

Infrastructure compromise

○ **STRING** **SECURITY PAGE** · S3\_INFRA\_LIST  
security.s3\_infra\_list

Registrar account takeover <abbr title="Domain Name System">DNS</abbr> hijack Hosting credential compromise

○ **BODY** **SECURITY PAGE** · S3\_NOISE\_BODY  
security.s3\_noise\_body

Continuous automated probing for common <abbr title="Content Management System">CMS</abbr> paths, configuration files, or known endpoints. These are treated as persistent background conditions rather than exceptional events.

○ **STRING** **SECURITY PAGE** · S3\_NOISE\_HEADING  
security.s3\_noise\_heading

Commodity internet noise

○ **STRING** **SECURITY PAGE** · S3\_SUMMARY  
security.s3\_summary

3. Threat model

○ **STRING** **SECURITY PAGE** · S4\_CONTENT\_HEADING  
security.s4\_content\_heading

## Public content

○ **STRING** **SECURITY PAGE** · S4\_CONTENT\_LIST  
security.s4\_content\_list

Static architecture reduces server-side attack surface Strict <abbr title="Content Security Policy">CSP</abbr> starting from <code>default-src 'none'</code> No external resource loading No dynamic script execution

○ **STRING** **SECURITY PAGE** · S4\_HOSTING\_HEADING  
security.s4\_hosting\_heading

## Hosting

○ **STRING** **SECURITY PAGE** · S4\_HOSTING\_LIST  
security.s4\_hosting\_list

Multi-factor authentication enabled <abbr title="Secure File Transfer Protocol">SFTP</abbr>-only deployment No <abbr title="Secure Shell">SSH</abbr> shell exposure No scheduled background execution

○ **STRING** **SECURITY PAGE** · S4\_MONITORING\_HEADING  
security.s4\_monitoring\_heading

## Monitoring

○ **STRING** **SECURITY PAGE** · S4\_MONITORING\_LIST  
security.s4\_monitoring\_list

Structured log analysis Pattern detection and anomaly scoring File integrity  
drift detection against the signed release baseline

○ **STRING** **SECURITY PAGE** · S4\_REGISTRAR\_HEADING  
security.s4\_registrar\_heading

Registrar & <abbr title="Domain Name System">DNS</abbr>

○ **STRING** **SECURITY PAGE** · S4\_REGISTRAR\_LIST  
security.s4\_registrar\_list

<abbr title="Multi-Factor Authentication">MFA</abbr> enabled Registrar  
lock active <abbr title="Domain Name System Security  
Extensions">DNSSEC</abbr> enabled and validated <abbr title="Certificate  
Authority Authorization">CAA</abbr> records restrict certificate issuance

○ **STRING** **SECURITY PAGE** · S4\_SUMMARY  
security.s4\_summary

## 4. Controls

○ **STRING** **SECURITY PAGE** · S6\_FOOTER  
security.s6\_footer

The main risks remain domain, <abbr title="Domain Name  
System">DNS</abbr>, hosting and private key compromise.

○ **STRING** SECURITY PAGE · S6\_INTRO  
security.s6\_intro

This model does not attempt to address:

○ **STRING** SECURITY PAGE · S6\_LIST  
security.s6\_list

Physical compromise of hosting infrastructure Global <abbr title="Domain Name System">DNS</abbr> root compromise Certificate authority (<abbr title="Certificate Authority">CA</abbr>) compromise State-level adversaries Zero-day browser exploits on client devices

○ **STRING** SECURITY PAGE · S6\_PROTECT\_SUMMARY  
security.s6\_protect\_summary

This model protects the public static site. It does not protect against registrar compromise, hosting compromise, client-device compromise or private key compromise.

○ **STRING** SECURITY PAGE · S6\_SUMMARY  
security.s6\_summary

## 6. Residual risk

○ **BODY** SECURITY PAGE · S7\_BODY  
security.s7\_body

Responsible disclosure is welcome. Security contact details and encrypted communication instructions are published at <a href="/.well-known/security.txt" aria-describedby="desc-security-contact"><code>/.well-known/security.txt</code></a>.

○ **STRING** **SECURITY PAGE** · S7\_SUMMARY  
security.s7\_summary

## 7. Disclosure

○ **STRING** **SECURITY PAGE** · S8\_LIST  
security.s8\_list

Simplicity over complexity  
Deterministic behaviour over dynamic systems  
Transparency over obscurity  
Verifiable integrity over trust assumptions

○ **STRING** **SECURITY PAGE** · S8\_SUMMARY  
security.s8\_summary

## 8. Design principles

### PART 07

# Source & Verification

190 entries

○ **STRING** **SOURCE PAGE** · COL  
source.col.validated

## Verified

○ **STRING** **SOURCE PAGE** · CURATION\_NOTE  
source.curation\_note

This index shows the principal public mirrors. Additional mirrored files may remain available by direct URL where they support verification, recovery, or release integrity.

○ **STRING** **SOURCE PAGE** · DOWNLOAD\_CHECKSUMS  
source.download\_checksums

## Checksums

○ **BODY** **SOURCE PAGE** · DOWNLOAD\_LEDE  
source.download\_lede

## Download the public source archive for the current edition

○ **STRING** **SOURCE PAGE** · DOWNLOAD\_TARGZ  
source.download\_targz

## TAR.GZ

## Editions

○ **STRING** **SOURCE PAGE** · EDITIONS  
source.editions.note.current

## Current signed release

○ **STRING** **SOURCE PAGE** · EDITIONS  
source.editions.note.earlier

## Earlier signed release

○ **TITLE** SOURCE PAGE · EDITIONS  
source.editions.title

## Edition lineage

○ **DESCRIPTION** SOURCE PAGE · FILES  
source.files.403\_html\_txt.description

## Forbidden page.

○ **DESCRIPTION** SOURCE PAGE · FILES  
source.files.404\_html\_txt.description

## Not found page.

○ **DESCRIPTION** SOURCE PAGE · FILES  
source.files.500\_html\_txt.description

## Server error page.

○ **DESCRIPTION** SOURCE PAGE · FILES  
source.files.ai\_usage\_txt\_txt.description

## Statement of AI usage and policy for the site.

○ **DESCRIPTION** SOURCE PAGE · FILES  
source.files.app\_enhance\_js\_txt.description

## Progressive enhancement layer. Non-essential interactions, gracefully optional.

○ **DESCRIPTION** SOURCE PAGE · FILES  
source.files.app\_js\_txt.description

## Authored runtime script. Navigation, language switch, citation drawer wiring.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.assertion\_txt\_txt.description

Authorship assertion. Declaration of authorship and integrity intent.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.attestations\_json\_txt.description

Public attestations. Verifiable claims about the site.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.changelog\_txt\_txt.description

Edition change log. Notable revisions to the public site.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.cite\_js\_txt.description

Cite-and-verify drawer. Surfaces canonical URL, page fingerprint and signature.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.fonts\_full\_css\_txt.description

Webfont declarations. Subsets, formats and fallbacks.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.htaccess\_txt.description

Apache configuration. Public-safety scanned before mirroring.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.humans\_txt\_txt.description

Credits and notes for the people behind the site.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.i18n\_core\_js\_txt.description

Editorial translation source. All five languages in one authored JSON.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.i18n\_de\_js\_txt.description

German translations.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.i18n\_es\_js\_txt.description

Spanish translations.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.i18n\_it\_js\_txt.description

Italian translations. Deployed compact bytes.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.index\_html\_txt.description

Home page. The editorial entry point.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.integrity\_index\_html\_txt.description

Integrity overview. The signed manifest, key and release authority.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.integrity\_releases\_2026\_05\_09\_index\_html\_txt.description

Frozen page record for the 2026-05-09 edition.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.integrity\_releases\_archive\_css\_txt.description

Stylesheet used inside frozen release archives. Held alongside its release records.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.integrity\_releases\_index\_html\_txt.description

Release index. The list of signed editions.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.llms\_txt\_txt.description

Machine-readable guidance for language models and AI systems.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.maintenance\_html\_txt.description

Maintenance notice. Used during planned downtime.

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.manifest\_webmanifest\_txt.description

Web app manifest. Installable surface metadata.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.pgp\_txt\_txt.description

PGP statement. The signing key fingerprint and its use.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.print\_css\_txt.description

Print stylesheet. Layout rules for paper output.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.privacy\_index\_html\_txt.description

Privacy statement. What is collected, retained and shared.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.readme\_txt.description

Orientation note for the source tree. Same text shipped at the root of every release archive.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.robots\_txt\_txt.description

Crawler access policy and public indexing intent.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.security\_acknowledgments\_index\_html\_txt.description

Acknowledgments for public security disclosures.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.security\_index\_html\_txt.description

Security posture. Architecture, headers and disclosure path.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.site\_metadata\_json\_txt.description

Site-level metadata. Edition, build, asset version.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.sitemap\_xml\_sha256\_txt.description

Source mirror of the SHA-256 checksum for sitemap.xml.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.sitemap\_xml\_txt.description

Public sitemap. URL inventory for crawlers.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.source\_manifest\_json\_txt.description

Manifest of the /source/ tree itself. Every mirrored file with its hash.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.statement\_txt\_txt.description

Editorial statement. The site's authoring principles.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.styles\_css\_txt.description

Authored stylesheet. Mirrored from source, not the minified deployed bytes.

---

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.sw\_cache\_manifest\_json\_txt.description

Service worker cache manifest. Files pinned for offline use.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.sw\_js\_txt.description

Service worker. Offline cache for the public site.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.sw\_reset\_index\_html\_txt.description

Service worker reset. Clears the offline cache.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.verify\_index\_html\_txt.description

Verification interface. Page-level fingerprint checks.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.verify\_verify\_js\_txt.description

Verification logic. Renders a page record from the verification map.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.well\_known\_attribution\_txt\_txt.description

Author attribution. Names the responsible party for the public site.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.well\_known\_build\_json\_txt.description

Build record. Reproducibility data for the current edition.

---

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.well\_known\_person\_json\_txt.description

Machine-readable identity in JSON-LD. The reference used by discovery, federation and verification.

○ **STRING** **SOURCE PAGE** · FILES  
source.files.well\_known\_person\_json\_txt.role

Canonical identity record

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.well\_known\_pgp\_key\_asc\_txt.description

ASCII-armoured public signing key. The publisher's signing identity.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.well\_known\_publication\_json\_txt.description

Publication record. Describes the site as a self-managed editorial work.

○ **DESCRIPTION** **SOURCE PAGE** · FILES  
source.files.well\_known\_security\_txt\_txt.description

Coordinated disclosure policy. Standard /.well-known/security.txt contact and scope.

○ **STRING** **SOURCE PAGE** · FILES  
source.files.well\_known\_security\_txt\_txt.role

Public trust surface

○ DESCRIPTION SOURCE PAGE · FILES  
source.files.well\_known\_webfinger\_txt.description

WebFinger discovery surface. Resolves identity across federated protocols.

○ STRING SOURCE PAGE · FILES  
source.files.well\_known\_webfinger\_txt.role

Identity discovery

○ STRING SOURCE PAGE · GROUP  
source.group.metadata

Metadata

○ STRING SOURCE PAGE · GROUP  
source.group.published-pages

Published pages

○ STRING SOURCE PAGE · GROUP  
source.group.scripts

Scripts

○ STRING SOURCE PAGE · GROUP  
source.group.trust-records

Trust records

○ **STRING** **SOURCE PAGE** · GROUP\_GLOSS  
source.group\_gloss.metadata

Server configuration and machine-readable records describing the site to crawlers, indexers and language models.

○ **STRING** **SOURCE PAGE** · GROUP\_GLOSS  
source.group\_gloss.published-pages

Readable mirrors of the principal public pages, served as plain text so the bytes can be inspected without execution.

○ **STRING** **SOURCE PAGE** · GROUP\_GLOSS  
source.group\_gloss.scripts

Authored stylesheets and JavaScript the page ships to the browser. Mirrored from source, not the minified deployed bytes.

○ **STRING** **SOURCE PAGE** · GROUP\_GLOSS  
source.group\_gloss.trust-records

Public commitments and identity surfaces. Who publishes the site, what is promised, where disclosure runs.

○ **STRING** **SOURCE PAGE** · HEADING  
source.heading

<span class="hero-line">Every public byte,</span><span class="hero-line">in plain text.</span>

○ BODY SOURCE PAGE · INTRO\_LEDE  
source.intro\_lede

Selected public files, published in readable form. For inspection, preservation, and machine readability.

○ KICKER SOURCE PAGE · PAGE\_KICKER  
source.page\_kicker

Source

○ BODY SOURCE PAGE · PRINT  
source.print.card.01.body

HTML mirrors. CSS. JavaScript. Manifest files. .htaccess mirror.

○ LABEL SOURCE PAGE · PRINT  
source.print.card.01.label

01 What is included

○ TITLE SOURCE PAGE · PRINT  
source.print.card.01.title

What is included

○ BODY SOURCE PAGE · PRINT  
source.print.card.02.body

Credentials. Private notes. Invoices. Backups. Generator internals unless explicitly public.

☐ LABEL SOURCE PAGE · PRINT  
source.print.card.02.label

02 What is excluded

☐ TITLE SOURCE PAGE · PRINT  
source.print.card.02.title

What is excluded

☐ BODY SOURCE PAGE · PRINT  
source.print.card.03.body

Sorted by file type, then name. Plain text mirrors. SHA-256 hashes. File sizes.

☐ LABEL SOURCE PAGE · PRINT

verify.kicker

## Verify

○ **BODY** **VERIFY PAGE** · LEDE  
verify.lede

A public route for checking source, hash, signature and canonical identity.

○ **BODY** **VERIFY PAGE** · LEDE\_V2  
verify.led\_v2

Check a published page against its canonical location, source mirror, page fingerprint and signed release archive.

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.closing

The signed manifest verifies the published file set. The source command hashes this page's mirror so it can be compared against the fingerprint above.

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.heading

## Verify locally

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.intro

Run two local checks: verify the signed manifest, then compare this page's source mirror against the expected fingerprint.

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.manifest\_desc

Checks that /integrity.json was signed by the published public key.

○ **LABEL** **VERIFY PAGE** · LOCAL  
verify.local.manifest\_label

## Verify the signed manifest

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.mirror\_desc

Calculates the source mirror fingerprint so it can be compared with the expected value above.

○ **LABEL** **VERIFY PAGE** · LOCAL  
verify.local.mirror\_label

Verify this page mirror

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.subheading\_manifest

Verify signed manifest

○ **STRING** **VERIFY PAGE** · LOCAL  
verify.local.subheading\_mirror

Verify source mirror

○ **STRING** LINKDESC · CHECKSUMS  
linkdesc.checksums

Download the SHA-256 checksums for the signed release archives

☐ **STRING** LINKDESC · CITE  
linkdesc.cite

Open citation and verification details for this page

☐ **STRING** LINKDESC · EMAIL  
linkdesc.email

Contact Trent Power by email

☐ **STRING** LINKDESC · HOME  
linkdesc.home

Return to the homepage

☐ **STRING** LINKDESC · INTEGRITY  
linkdesc.integrity

Open the public integrity record, including hashes, signatures, and release verification

☐ **STRING** LINKDESC · LANG\_EN  
linkdesc.lang\_en

Read this site in English

☐ **STRING** LINKDESC · LANG\_FR  
linkdesc.lang\_fr

Lire ce site en français

○ **STRING** **LINKDESC** · LINKEDIN  
linkdesc.linkedin

Open Trent Power's LinkedIn profile in a new tab without sending referrer data

○ **STRING** **LINKDESC** · MANIFEST  
linkdesc.manifest

Download the signed integrity manifest (JSON listing every public file and its SHA-256)

○ **STRING** **LINKDESC** · NOW  
linkdesc.now

Read what Trent Power is currently focused on

○ **STRING** **LINKDESC** · PRIVACY  
linkdesc.privacy

Read how this site avoids analytics, cookies, profiling, tracking, and third-party assets

○ **STRING** **LINKDESC** · PUBLIC\_KEY  
linkdesc.public\_key

Download the public PGP key used to sign releases

○ **STRING** **LINKDESC** · SECURITY\_CONTACT  
linkdesc.security\_contact

Read the security.txt disclosure policy for this site

○ **STRING** **LINKDESC** · SECURITY\_THREAT\_MODEL  
linkdesc.security\_threat\_model

Read the security architecture and threat model for this site

○ **STRING** **LINKDESC** · SIGNATURE  
linkdesc.signature

Download the detached PGP signature for the integrity manifest

○ **STRING** **LINKDESC** · SOURCE  
linkdesc.source

View the public source mirror of this site, with readable annotations and line references

○ **STRING** **LINKDESC** · TARGZ  
linkdesc.targz

Download the source archive as a TAR.GZ file

○ **STRING** **LINKDESC** · THEME\_AUTO  
linkdesc.theme\_auto

Match the system appearance setting

○ **STRING** **LINKDESC** · THEME\_DARK  
linkdesc.theme\_dark

Switch to the dark appearance

○ **STRING** **LINKDESC** · THEME\_LIGHT  
linkdesc.theme\_light

Switch to the light appearance

○ **STRING** **LINKDESC** · VERIFY  
linkdesc.verify

Check the current page against the published integrity data

○ **STRING** **LINKDESC** · VERIFY\_LOCALLY  
linkdesc.verify\_locally

Read the instructions to verify the publication locally with command-line tools

○ **STRING** **LINKDESC** · ZIP  
linkdesc.zip

Download the source archive as a ZIP file

○ **BODY** **RELEASE\_ARCHIVE** · PRINT  
release\_archive.print.card.01.body

/integrity.json - SHA-256 hashes of every intentional public file at edition time.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.assets

stylesheets, scripts, icons, manifest.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.base

reset and base element typography.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.components

reusable component styles.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.copy

clipboard interactions.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.discovery

indexing and referrer policy.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.document

page title, description, canonical url.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.events

event listeners and interaction wiring.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.fonts

font face declarations and font assets.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.footer

colophon, language switch, footer actions.

---

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.foundations

character encoding, viewport, colour scheme.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.head

document head — metadata, no rendered content.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.header

site header — wordmark and primary nav.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.i18n

translation lookup and language switching.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.icons

platform icons and home-screen artwork.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.identity

authorship, application name, attribution links.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.init

boot sequence — runs once on load.

---

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.layout

page-level layout grammar.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.modals

overlay surfaces, dialogs, focus traps.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.policy

declared site policies.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.print

print stylesheet rules.

○ **STRING** **SOURCE\_READER** · GLOSS  
source\_reader.gloss.records

editorial record entries.
